Abstract.....	3
Resumen	6
Introduction	20
Ecohydrological features and functioning of dryland ecosystems	21
Patchiness strategy in response to water scarcity	23
Indicators of the ecohydrological functioning of drylands	25
Drylands and climate change	28
Hypothesis	31
Aims	33
General Methodology	34
Study object: <i>Macrochloa tenacissima</i> steppes.....	34
Space for time substitution approach.....	35
Experimental aridity gradients.....	37
Remoted sensed aridity gradient.....	40
References	41
Chapter I: Lithology modulates the response of water limited Mediterranean ecosystems to aridification.	52
Abstract.....	53
Introduction.....	54
Methods	56
Results.....	63
Discussion.....	68
Conclusions.....	74
References.....	76
Supplementary	87
Chapter II: New methodological approach to characterize dryland’s ecohydrological functionality on the basis of Balance between Connectivity and potential Water Retention Capacity (BalanCR)	91
Abstract.....	92
Introduction.....	93

Material and methods.....	95
Results.....	101
Discussion.....	106
Conclusions.....	110
References.....	111
Supplementary	116
Chapter III: Runoff water redistribution buffers the negative impact of aridification in drylands	117
Abstract.....	118
Introduction.....	119
Results.....	121
Discussion.....	127
Methods	130
Acknowledgements.....	135
References.....	136
Supplementary	141
Chapter IV: Non-Destructive Biomass Estimation in Mediterranean Alpha Steppes: Improving Traditional Methods for Measuring Dry and Green Fractions by Combining Proximal Remote Sensing Tools	150
Abstract.....	151
Introduction.....	152
Material and methods.....	154
Results.....	161
Discussion.....	166
Conclusions.....	169
References.....	171
Supplementary	184
Chapter V: Experimental assessment of the effect of runoff water supply on vegetation and soil response to increasing aridity in Mediterranean drylands.....	185
Abstract.....	186
Introduction.....	187
Methods	189
Results.....	196
Discussion.....	202

Conclusions.....	206
References.....	207
Supplementary	213
General conclusions.....	223
Publications derived from this thesis.....	226
Other related publications.....	229

*Note: The references in the unpublished chapter and in the general parts of the thesis are following the same format. For published chapters references follow the format of the journal.
