

INDEX

FIRST PART: BIOMASS PRODUCTION	4
Introduction to Microalgae Biomass Production (4 sessions)	5
Session 1: Learning sterile techniques and preparing sterile material.....	6
Session 2: Inoculum preparation and sampling.....	11
Session 3: Scaling Up Microalgae Culture: Preparation of Materials, Inoculum and Culture Medium for Inoculating a 2L Bioreactor	13
Session 4: Preparing and Setting Up a Bubble Column Bioreactor and a raceway for Inoculation.....	15
APPENDIX 1: BG-11 Medium Recipe	20
Upstream process: Determination of light attenuation in microalgae cultures.....	22
Upstream process: Pre-concentration techniques and centrifugation	25
SECOND PART: BIOPRODUCTS	31
Downstream process: Lipid, carotenoid and fatty acid extractions. Biodiesel	32
APPENDIX 2: METHYLATION ASSAYS	43
Extraction of phycobiliproteins from microalgae.....	45
THIRD PART: SUSTAINABILITY AND CIRCULAR ECONOMY	50
Microalgae and Circular Bioeconomy	51
Activity 1: How do microalgae contribute to the achievement of the Sustainable Development Goals (SDGs)?.....	52
Activity 2: Circular economy and microalgae	53
FINAL PART: APPLICATION ACTIVITY	54
